MANAGEMENT'S DISCUSSION OF MONTHLY RESULTS

Information on trends and events in the marketplace of the issuer, which may, in the issuer's opinion, have important consequences in the future for the financial condition and results of the issuer:

We were working on new projects agreement preparation. It means 8 projects for our customers and two our own projects at this time. The cogeneration units, for our customers biogas plants built at the end 2012, were started in January. Our biogas plant Ovesna Lhota is almost finished.

The new legislation, valid from the beginning of January, bring worse conditions for the renewable resources energy production. But there is still good space for construction of effective projects.

Information concerning how the capital raised in the private placement was used in the calendar month covered by the report, and whether any of the contributed capital was spent during the month:

In the period covered by the report there was no use of funds raised from private placement.
