**BGS Biogas, a.s.**

The BGS Biogas provided the specialized service for our biogas plants and for our customers as well during April. The scale of the services is from the simple to complex ones, it was necessary to change heating pipeline at Kačina Biogas Plant. The customers mostly order cogeneration units reparations. We can use the internal system my2G from our technology partner 2GEnergietechnik which enable us to manage the orders more efficiently.

---

**Energy produkt plus s.r.o.**

The biogas plants operated by Energy produkt plus worked very well during last month. We make our best efforts to decrease the biogas plants own energy consumption.

---

**Agroprodukt plus, a.s.**

The most dynamic activities you can see within Agroprodukt plus company during April. As the weather conditions were rather favourable we could fulfill necessary agrotechnological terms. We do not suffer any damages caused by spring frosts. We are negotiating selling agreements now and it seems the agricultural prices stay at the same level as 2016. We have achieved very good evaluation for our milk production quality from our biggest customer
