

**1 Information on the occurrence of trends and events in the market environment of the issuer, which in the issuer's opinion may have important consequences in the future for financial condition and results of the issuer**

During May the amendment to the Renewable Energy Act 180/2005 become effective. The change in the Renewable Energy Act will allow the Energy Regulator ERÚ to reduce the Feed-in-Tariff (FiT) for renewable energy sources by more than the 5% limit if the (simple) return period is shorter than 11 years. This change will allow ERÚ to reflect the decrease in investment costs for photovoltaic plants for the FiT for the year 2011. No radical change is expected within the biogas area.

Anyway BGS Group intensively works on its own projects of biogas stations, the building of Suchdol and Číhošť biogas stations continue.

**2 Summary of all information published by the issuer under the current report for the period covered by the report**

In the period covered by this report, the following current reports were published in EBI system:

Current report No 11/2010 published on 11-05-2010: BGS Annual Report- change in the publication date
